

## Sympodium™ interactive pen display

### The perfect teaching tool

An effective presentation is more than just words spoken. A strong message is based on both verbal and nonverbal communication. That's why the Sympodium™ interactive pen display is the perfect teaching tool. It gives you the freedom to interact with and engage your students while you deliver a digital lecture. To get started, just connect the display to your computer and a projector, and you're set.

### Just write

Operating the Sympodium interactive pen display is easy. Comfortably interact with your material without losing eye contact with your students. Touch the screen with the pen, and you can control applications or write with digital ink, including PowerPoint® slides, websites and moving videos, while students see the same image projected on a large screen.

### Stand and deliver

As you teach, you don't have to move from computer to projector, which creates distractions and wastes valuable time. You control pace and flow, making learning an active, dynamic process. And it's all done from one location.

Whether you're using material you have created or you're referencing secondary sources, you can incorporate all of it in your lecture. Refer to a film scene from a DVD, listen to music or look at blog entries on the Internet – all of these and more can be easily integrated into your presentation. When finished, save your notes into one convenient file that you can share with your students and colleagues.

**Control computer applications and write notes on the LCD screen while your students see the same image projected on a larger screen**

## Features

- 1** On-screen buttons    **2** Pen-tool buttons  
(left mouse button, digital ink color, eraser)
- 3** USB port    **4** Function buttons (On-Screen  
Keyboard, right mouse button, capture, floating  
pen tools, Notebook™ software)    **5** USB port

## Key features

The ID350 is perfect for situations that require versatile features in a compact package.

The ID370 is ideal when visibility and clarity are critical, especially when displaying highly detailed material.

- **Interactive screen** – Control your computer with the pen tool. Write over any application. The pen tool is the point of contact on the screen, so you don't have to worry if you brush the screen with your palm or sleeve. Each screen display is designed with sharp corners, straight sides and a flat bezel so there is nothing to impede your natural writing flow.
- **Save function** – Capture your work in Notebook software or save notes directly into several software applications, including Windows® versions of Microsoft® PowerPoint®, Word and Excel®, or into AutoCAD® software.
- **Battery-free tethered pen** – Write smoothly and comfortably with the attached pen. Because the pen is battery-free, there's no maintenance cost or downtime searching for replacement batteries.
- **Pen-tool buttons** – Change ink color, or use the eraser without crowding your display with toolbars.
- **Function buttons** – Quickly access the right mouse button, On-Screen Keyboard, Screen Capture tool, Floating Tools toolbar and Notebook software.
- **On-screen display buttons** – Fine-tune display properties to suit your preferences.
- **Adjustable tilt stand** – Move the console to a comfortable viewing angle.
- **VESA mounting plate** – Integrate the Symposium ID350 and ID370 interactive pen displays with any standard VESA mounting arm (75 mm for the ID350 and 100 mm for the ID370).
- **USB connection** – Easily connect the ID350 or ID370 to your computer.
- **USB ports** – Enhance your presentation by connecting a memory key, document camera or other peripherals to the two 2.0 high-speed ports.
- **RGB video pass-through** – Connect the ID350 or ID370 to a digital projector so both devices display the same image.
- **Warranty** – Two-year limited warranty.

## Dimensions ID350

**Active screen area**  
15" (38.1 cm) diagonal  
**Size**  
13 1/2" W x 1 7/8" D x 11 3/4" H  
(34.3 cm x 4.8 cm x 29.9 cm)  
**Weight**  
10 lb. (4.6 kg)  
**Resolution**  
XGA (1024 x 768)

## Dimensions ID370

**Active screen area**  
17" (43.2 cm) diagonal  
**Size**  
15 3/4" W x 2 1/4" D x 14 1/4" H  
(40.0 cm x 5.7 cm x 36.2 cm)  
**Weight**  
13 lb. (6.0 kg)  
**Resolution**

## SMART Board software

Ever wonder what makes SMART Board™ interactive whiteboards so powerful? Meet SMART Board software – the real genius behind the world's number one interactive whiteboard.

### Notebook software

- Create dynamic lessons using Notebook software's Gallery of thousands of vibrant, curriculum-relevant images, video files and lesson activities
- Add hyperlinks to images, shapes and text to jump to websites, multimedia files or other Notebook pages
- Use superscript and subscript characters, scientific symbols and Adobe® Flash® extras in your science and math lessons
- View and arrange Notebook pages in a variety of ways. Use the Dual Page Display to see two pages at once, or drag and drop pages as you wish
- Use colorful pens to write over your lessons, then convert handwriting to text with the press of a button
- Save files in various formats (e.g., PDF, HTML) or as separate image files (e.g., JPEG, PNG, GIF), and e-mail them to students for review

### Ink Aware

- Write and save notes in many third-party applications, including Microsoft Word, PowerPoint and Excel software

### SMART Board Tools

- Write over moving or paused video, or record all screen activity as a video
- Type with the On-Screen Keyboard
- Focus attention with the resizable Spotlight tool, or use the Screen Shade to reveal your information step by step

### LinQ™ software

- Connect quickly between devices. Use your laptop to project onto and control applications or the interactive whiteboard (and vice versa).

### Software system requirements

- Supports Windows, Mac OS and Linux® operating systems
